# Some of our most popular point-of-sale solutions are also the smallest

The perfect solution for busy garden centers who want WIRELESS point-of-sale. With a combination of Microsoft Dynamics RMS 2.0 and the Opticon, you'll have a complete wireless inventory management system ready to work inside or out. Your customers will appreciate the convenience and your sales will grow with more customer face-time. And you'll better understand their landscape projects, making intelligent suggestions for additional plant material, pest control, lights, fertilizer, irrigation and other landscape-related products. Tendering a sale anywhere, that's secure and reliable, will increase the efficiency of your staff and enhance the customer experience.

## Mobile Point-of-Sale

Inventory Control  
in the palm of your hand
